Product Description

stainless steel forged socket welding pipe flange ASME B16.5 RAISED FACE(S) WITH FINISH TO MSS SP6

Socket Weld Flange
A Socket Weld Flange is similar to slip on flanges,however, socket welds have an internal recess on the inside diameter to allow for a smoother flow of the process fluid. The positive of this is that is creates a smooth bore with the proper welding and grinding. The negative of this type of flange is that it can be more expensive than a slip-on due to more intricate machining, and they can be less readily available than slip-ons due to the fact that the bottom half of the inside diameter must be made to the same schedule as the pipe that is being used (you must specify the schedule needed)
These socket weld flanges were initially developed for use on smaller sizes of pipe at higher pressure ratings.
Product Type:
Weld Neck Flange, Slip On Flange, Socket Welding Flange, Lap Joint Flange, Threaded Flange
Blind Flange/Blind, Orifice Flange, Integral Pipe Flange, Reducing Flange, Pad Type Flange,
Loose Hubbed Flange, Welding Plate Flange, Weldoflange, Nipoflange, Welding Neck Collar,
Welding-on Collar
And we have ASME B16.5 SS 304 Forged Flanges, Blind Flange Distributor, ANSI B16.5 SS 304 Plate Flanges, SS 304 Plate Flange Dealer, ASME SA182 SS 304 Orifice Flanges, Stainless Steel 304 Threaded Flange
PP bag or soft white paper for individual packing,then put into wooden case or carton,Pallet is available if customer request.
