Product Description

GB JIS DIN EN Stainless Steel Pipes And Tubes Industry 310 Cold Drawn Steel Pipe

Products description:

Great ductility, weldability, and high-temperature properties make 310 Stainless Steel the ideal choice for projects that require service at temperatures up to 1150 degrees Celsius. Grade 310 resists oxidation and is also used at temperatures up to 1040 degrees Celsius intermittently. Similar to other austenitic steel grades, toughness down to cryogenic temperatures is another feature of 310.

Applications:

Versatile and useful in many areas, 310 Stainless Steel is often found in furnace parts, heat exchangers, welding filler wire, oil burner parts, and general heat treatment.
