Product Description

SA312 TP317L Best quality 317L Stainless Steel Tube and SS UNS S31703 Seamless Pipe

1.4541 (S32168) is a titanium stabilized austenitic stainless steel with excellent corrosion resistance and high temperature mechanical properties. It has good corrosion resistance in atmospheric environment and different organic and inorganic acid media. The steel also has good intergranular corrosion performance, and the addition of titanium can improve its corrosion resistance. Due to its low carbon content, it is generally not recommended for use under high temperature or hydrogen corrosion conditions.

It has the advantages of austenitic and ferritic stainless steel and has superplasticity. Stainless steel with about half austenitic and half ferritic structure. In the case of low carbon content, the chromium (Cr) content is 18% to 28%, and the nickel (Ni) content is 3% to 10%. Some steels also contain Mo, Cu, Si, Nb, Ti, N and other alloying elements.

Applications:

Equipment and parts for the food and chemical industry.
