## Product Description

### DIN EN 1.4404 Stainless Steel Tube hot finish used in Construction, construction

Steel grade 1.4404 (also known as ASTM 316/316L and /SS2348) is a stainless steel "acid-proof" steel that is easy to work. The steel has improved machinability and is suitable for processing to produce corrosion-resistant products. 1.4404 has very good corrosion resistance and is therefore very useful in a wide range of fields. It has increased resistance to pit and crevice corrosion in environments containing luides. It is non-magnetic, but may become slightly magnetic after cold work and welding.

1.4404 can be easily welded by various traditional welding methods. It cannot be hardened by heat treatment, but can be hardened by cold work. The steel is easy to process and has good machinability.
