Wenzhou Zheheng Steel Industry Co.,Ltd
stainless-steelseamlesspipe.com

Trading Company Providing 304 Grade Seamless Stainless Steel Tubing Seamless Welding Line Type For Industrial Fabrication

Our Product Introduction

for more products please visit us on stainless-steelseamlesspipe.com

Basic Information

- Place of Origin: CHINA
- Brand Name: zheheng
- Certification: ISO9001 PED
- Model Number: 5mm
- Minimum Order Quantity: 500
- Price: \$1000-3500/Ton
- Packaging Details: wooden
- Delivery Time: 5-45days
- Payment Terms: L/C, T/T
- Supply Ability: 10000+

Product Specification

- Wallthicknessrange: 0.5mm To 10mm
- Company Type: Factory And Trading
- Grade: 304, 316, 321, 310, 904L
- Tube Type: Seamless
- Hs Code: 73044190
- Qualification: Air Tightness Tested
- Welding Line Type: Seamless / Welded
- Length: Customizable, Typically Up To 6 Meters

Product Description

Trading Company Providing 304 Grade Seamless Stainless Steel Tubing

Our Seamless Stainless Steel Tubing is a high-quality product designed to meet the rigorous demands of various industrial applications. Manufactured with precision and expertise, this tubing offers exceptional durability, corrosion resistance, and superior performance, making it an ideal choice for industries requiring reliable and long-lasting piping solutions.

Key Features

- Product Name: Seamless Stainless Steel Tubing
- Surface Finish Options: Polished, Pickled, or Mill Finish
- Available Grades: 304, 316, 321, 310, 904L
- Wall Thickness Range: 0.5mm to 10mm
- Port of Shipment: Ningbo
- Company Type: Factory and Trading
- High Quality Stainless Tubing ensuring durability and performance
- Suitable for various industrial applications
- Manufactured with strict quality control

Technical Specifications

Wall Thickness Range	0.5mm To 10mm
Steel Grades	304
Welding Line Type	Seamless / Welded
Processing Technique	L Cold Drawn
Tube Type	Seamless
Grade	304, 316, 321, 310, 904L
Port	Ningbo
HS Code	73044190
Qualification	Air Tightness Tested
Alloy	Yes

Applications

The Seamless Stainless Steel Tubing, processed using advanced L Cold Drawn techniques, offers exceptional precision and durability, making it an ideal choice for various industrial and commercial applications. This Precision Seamless Steel Tube is manufactured to meet stringent quality standards, ensuring superior performance in demanding environments.

Primary applications include chemical and petrochemical industries, food and pharmaceutical sectors, automotive and aerospace industries, and construction and architectural projects. The tubing's excellent corrosion resistance, high strength-to-weight ratio, and seamless construction make it suitable for fluid transport, structural supports, and specialized equipment.

Customization Options

Our Seamless Stainless Steel Tubing product offers exceptional quality and customization options to meet your specific needs. We provide both seamless and welded welding line types, crafted from high-grade 304 steel, ensuring durability and corrosion resistance. As a reputable factory and trading company, we guarantee reliable supply and competitive pricing with international trade compliance.

Support and Services

Our product is backed by comprehensive technical support and services to ensure optimal performance and customer satisfaction. We offer detailed product information, application guidance, troubleshooting assistance, and tailored solutions for specific industry requirements.

Quality assurance processes guarantee that each tube meets stringent standards, with technical documentation provided for every order. After-sales support includes installation advice, maintenance tips, and repair services to maximize lifespan and efficiency.

Frequently Asked Questions

Q1: What are the typical applications of Seamless Stainless Steel Tubing?

A1: Seamless Stainless Steel Tubing is commonly used in industries such as automotive, aerospace, construction, chemical processing, and food processing due to its high strength, corrosion resistance, and durability.

Q2: What grades of stainless steel are available for seamless tubing?

A2: Seamless Stainless Steel Tubing is typically available in various grades including 304, 316, and 321, each offering different levels of corrosion resistance and mechanical properties to suit specific applications.

Q3: What are the standard dimensions and thicknesses for Seamless Stainless Steel Tubing?

A3: The tubing is available in a wide range of diameters and wall thicknesses, often customizable to meet client requirements. Standard sizes usually range from small diameter precision tubes to large structural tubes.

Q4: How is Seamless Stainless Steel Tubing manufactured?

A4: Seamless tubing is produced by extruding a solid billet over a piercing rod to create a hollow tube without any welded seams, which enhances its strength and integrity.

Q5: What corrosion resistance properties does Seamless Stainless Steel Tubing offer?

A5: Due to the chromium content in stainless steel, the tubing provides excellent resistance to rust, oxidation, and various corrosive environments, making it suitable for harsh industrial and outdoor applications.
