316 Grade Stainless Tubing Featuring Or Mill Finish Engineered for Precision and Reliability in Various Industries

Our Product Introduction

for more products please visit us on stainless-steelseamlesspipe.com

Basic Information

- Place of Origin: CHINA
- Brand Name: zheheng
- Certification: ISO9001 PED
- Model Number: 5mm
- Minimum Order Quantity: 500
- Price: \$1000-3500/Ton
- Packaging Details: wooden
- Delivery Time: 5-45days
- Payment Terms: T/T, L/C
- Supply Ability: 10000+

Product Specification

- Alloy Or Not: Yes
- Processing Technique: L Cold Drawn
- Welding Line Type: Seamless / Welded
- Qualification: Air Tightness Tested
- Port: Ningbo
- Length: Customizable, Typically Up To 6 Meters
- Steel Grades: 304
- Item Name: Welded Stainless Steel Pipe / Piping

Product Description

316 Grade Stainless Tubing Featuring Or Mill Finish

Product Overview

Our Seamless Stainless Steel Tubing is a high-quality solution designed to meet rigorous industrial demands. Manufactured with precision using superior materials, this tubing offers exceptional durability, corrosion resistance, and excellent mechanical properties. The seamless construction ensures there are no welded joints, significantly enhancing strength and pressure resistance for applications requiring high integrity and leak-proof performance.

Key Features

- Product Name: Seamless Stainless Steel Tubing
- Grades Available: 304, 316, 321, 310, 904L
- Steel Grade: 304
- Tube Type: Seamless
- Material: Alloy
- Company Type: Factory And Trading
- High-quality seamless steel alloy tubing for industrial applications
- Durable and corrosion-resistant industrial stainless steel pipe
- Precision-engineered seamless steel alloy tubing for reliable performance

Technical Specifications

Port	Ningbo
Company Type	Factory And Trading
Length	Customizable, Typically Up To 6 Meters
HS Code	73044190
Wall Thickness Range	0.5mm To 10mm
Alloy Or Not	Yes
Steel Grades	304
Surface Finish	Polished, Pickled, Or Mill Finish
Grade	304, 316, 321, 310, 904L
Thickness Tolerance	1.3mm, 1.5mm, 2mm

Applications

This high-quality stainless tubing is designed for diverse applications across various industries. In chemical processing plants, it provides resistance to aggressive chemicals and high temperatures. The food and beverage industry utilizes its hygienic surface finish for sanitary pipelines. Construction and architectural sectors employ it for structural support, handrails, and decorative elements. Automotive and aerospace industries benefit from its lightweight yet robust properties for critical components exposed to dynamic stresses.

Customization Options

We offer comprehensive customization services to meet specific industrial needs. Customized lengths are available, typically up to 6 meters, providing flexibility for various project requirements. Our products are manufactured with high-quality 304 alloy steel and shipped from our port in Ningbo, ensuring timely and reliable delivery of tailored solutions that combine quality, precision, and customization.

Support & Services

Our product is backed by comprehensive technical support including detailed documentation, installation guidelines, and maintenance instructions. Our experienced technical team assists with product selection, application suitability, and troubleshooting. We provide custom fabrication, finishing services, and rigorous quality assurance testing to guarantee durability, corrosion resistance, and compliance with industry standards.

Frequently Asked Questions

Q1: What materials are used to manufacture Seamless Stainless Steel Tubing?

A1: Seamless Stainless Steel Tubing is typically made from high-quality stainless steel grades such as 304, 316, and 321, which provide excellent corrosion resistance and durability.

Q2: What are the common applications of Seamless Stainless Steel Tubing?

A2: This tubing is widely used in industries like automotive, aerospace, chemical processing, food and beverage, and medical equipment due to its strength, corrosion resistance, and seamless construction.

Q3: What sizes and dimensions are available for Seamless Stainless Steel Tubing?

A3: Seamless Stainless Steel Tubing is available in a variety of outer diameters, wall thicknesses, and lengths to meet specific project requirements. Custom sizes can also be produced upon request.

Q4: How does seamless tubing compare to welded tubing?

A4: Seamless tubing has no welded seams, which enhances its strength and resistance to pressure and corrosion, making it more suitable for high-stress and high-pressure applications compared to welded tubing.

Q5: Is Seamless Stainless Steel Tubing suitable for high-temperature environments?

A5: Yes, depending on the stainless steel grade used, seamless tubing can withstand high temperatures and is often used in heat exchangers, boilers, and other high-temperature applications.
