

ZHEHENG STEEL

Wenzhou Zheheng Steel Industry Co.,Ltd
stainless-steelseamlesspipe.com

Round Stainless Steel Metal Pipe Diameter Range 6mm to 200mm Manufactured for High Durability and Consistent Performance

Basic Information

- Place of Origin: CHINA
- Certification: ISO9001 PED
- Minimum Order Quantity: 500
- Price: \$1000-3500/Ton
- Packaging Details: wooden
- Delivery Time: 5-45days
- Payment Terms: L/C, T/T

Product Specification

- End Treatment: Threaded, Beveled, Plain, Screwed, Etc.
- Mechanical properties: High Tensile Strength, Good Ductility
- Finish: Brush Polish, 240#, 2B BA Matte Mirror
- Packing: Ply Wooden Case
- Surface finish: Polished / Matte / Brushed
- Welding Type: TIG, MIG, Laser
- Technology: Welded
- Diameter range: 6mm - 200mm

Product Description

Round Stainless Steel Metal Pipe

Diameter Range 6mm to 200mm Manufactured for High Durability and Consistent Performance

Product Overview

The Stainless Steel Welded Tube is a high-quality product originating from China, designed to meet the diverse needs of industrial, commercial, and architectural applications. This product is widely recognized for its exceptional mechanical properties, including high tensile strength and good ductility, making it a reliable choice for projects demanding durability and performance.

Manufactured with precision, the Stainless Steel Welded Tube is available in a diameter range from 6mm to 200mm, providing versatility to suit various engineering and construction requirements. The welding process ensures a seamless finish that enhances structural integrity, making it ideal for piping systems, mechanical components, and architectural frameworks.

Key Features

- Product Name: Stainless Steel Welded Tube
- Origin: China
- Packing: Ply Wooden Case
- HS Code: 722840000
- Payment Term: 30% T/T Advance + 70% Balance
- Condenser Tubes Standard: ASTM A249
- High-quality stainless steel suitable for various industrial applications
- Excellent corrosion resistance and durability
- Precision manufacturing ensuring strong welds and uniformity

Technical Specifications

Parameter	Specification
Origin	China
Welding Type	TIG, MIG, Laser
Welding Line Type	Round, Square
Surface Finish	Polished / Matte / Brushed
End Treatment	Threaded, Beveled, Plain, Screwed, Etc.
HS Code	722840000
Technology	Welded
Condenser Tubes Standard	ASTM A249
Steel Grade	300 Series, 304L, 316L, 310S, Etc.
Finish	Brush Polish, 240#, 2B, BA, Matte, Mirror

Applications

The Stainless Steel Welded Tube is a versatile and reliable solution widely utilized across various industries. Crafted from high-quality steel grades including 300 Series, 304L, 316L, and 310S, this product ensures exceptional performance in demanding applications.

Primary applications include heat exchangers and condensers in chemical processing plants, power generation facilities, and petrochemical industries. The tubes are also ideal for architectural and structural applications such as handrails, balustrades, and decorative frameworks, offering both aesthetic appeal and robust mechanical properties.

Customization Services

Our Stainless Steel Welded Tube product offers comprehensive customization services to meet your specific requirements. We provide versatile options with diameter ranges from 6mm to 200mm, manufactured in premium steel grades including 300 Series, 304L, 316L, 310S, and more.

Payment terms are set at 30% T/T advance with the remaining 70% balance payable before shipment. All products are carefully packed in sturdy ply wooden cases to ensure safe delivery.

Support & Services

We provide comprehensive technical support including detailed product specifications, installation guidelines, and maintenance instructions. Our expert technical team is available to assist with product selection, customization options, and troubleshooting.

Quality assurance documentation including material test reports and certifications is provided to guarantee product compliance with industry standards. After-sales service includes inspection assistance and guidance on proper handling and storage.

Frequently Asked Questions

Q1: What materials are used in the Stainless Steel Welded Tube?

A1: The Stainless Steel Welded Tube is made from high-quality stainless steel alloys, typically grades 304 or 316, which offer excellent corrosion resistance and durability.

Q2: What are the common applications of Stainless Steel Welded Tubes?

A2: These tubes are widely used in construction, automotive, furniture manufacturing, chemical processing, and food processing industries due to their strength and resistance to rust.

Q3: What sizes and dimensions are available for the Stainless Steel Welded Tube?

A3: Stainless Steel Welded Tubes come in various diameters and wall thicknesses tailored to customer specifications, commonly ranging from 10mm to 200mm in diameter with customizable lengths.

Q4: How is the surface finish of the Stainless Steel Welded Tube?

A4: The tubes are typically supplied with a smooth, polished surface finish that can be further customized, such as brushed, mirror, or matte finishes, depending on the application requirements.

Q5: Are the Stainless Steel Welded Tubes suitable for high-pressure environments?

A5: Yes, due to their welded seam and material strength, these tubes can withstand moderate to high-pressure conditions, making them suitable for various industrial applications.
