300 Series Stainless Steel Welded Tube Built to ASTM A249 Standard Suitable for Condenser Tubes and Industrial Equipment

Basic Information

- Place of Origin: CHINA
- Brand Name: zheheng
- Certification: ISO9001 PED
- Minimum Order Quantity: 500
- Price: \$1000-3500/Ton
- Packaging Details: wooden
- Delivery Time: 5-45days
- Payment Terms: L/C, T/T
- Supply Ability: 10000+

Product Specification

- Steel Grade: 300 Series,304L,316L 310S Etc
- Diameterrange: 6mm - 200mm
- End Treatment: Threaded, Beveled, Plain, Screwed, Etc.
- Slot Size: 14-57mm
- Welding Type: TIG, MIG, Laser
- Surfacefinish: Polished / Matte / Brushed
- Technolgy: Welded
- Payment Term: 30%T/T Advance + 70% Balance

Our Product Introduction

Product Description

300 Series Stainless Steel Welded Tube Built to ASTM A249 Standard

Product Overview

This high-quality Stainless Steel Welded Tube from China offers exceptional durability, corrosion resistance, and structural integrity for various industrial applications. Manufactured to meet rigorous quality standards, it's ideal for construction, automotive, chemical processing, and heat exchanger manufacturing.

Available in diameters from 6mm to 200mm with slot sizes ranging from 14mm to 57mm, this product provides flexibility for different project requirements. Compliance with ASTM A249 standards ensures outstanding performance in heat exchange and fluid transportation systems.

Key Features

- Product Name: Stainless Steel Welded Tube
- Origin: China
- Finish Options: Brush Polish, 240#, 2B BA Matte Mirror
- Mechanical Properties: High Tensile Strength, Good Ductility
- Welding Types: TIG, MIG, Laser
- Slot Size Range: 14-57mm
- Suitable for applications requiring durable Stainless Steel Tubing Pipe
- High-quality construction ensuring strength and reliability
- Versatile design ideal for various industrial uses

Technical Specifications

Parameter	Specification
Steel Grade	300 Series, 304L, 316L, 310S Etc
Welding Type	TIG, MIG, Laser
HS Code	722840000
Slot Size	14-57mm
Condenser Tubes Standard	ASTM A249
Packing	Ply Wooden Case
Welding Line Type	Round, Square
Payment Term	30% T/T Advance + 70% Balance
Origin	China
Mechanical Properties	High Tensile Strength, Good Ductility

Applications

This versatile Stainless Steel Welded Tube is widely used across numerous industries including construction frameworks, automotive components, heavy machinery parts, furniture, handrails, and architectural elements. It's also extensively applied in chemical plants, food processing units, and pharmaceutical industries where hygiene and chemical corrosion resistance are essential.

Customization Options

We offer comprehensive customization services including various end treatments (Threaded, Beveled, Plain, Screwed), slot size customization within 14-57mm range, and multiple finishing options (Brush Polish, 240#, 2B BA Matte, Mirror). Manufactured according to ASTM A249 standards using advanced welding techniques to ensure strong, durable, and clean welds.

Support & Services

Our products come with comprehensive technical support including detailed specifications, material certifications, and compliance documents. Our expert team provides guidance on product selection, installation, and maintenance. All welded tubes undergo rigorous testing including dimensional inspections, corrosion resistance assessments, and mechanical property evaluations.

Frequently Asked Questions

What are the common applications of Stainless Steel Welded Tubes?

Stainless Steel Welded Tubes are widely used in industries such as construction, automotive, chemical processing, food processing, and oil & gas due to their corrosion resistance, strength, and durability.

What grades of stainless steel are available for welded tubes?

Common grades for Stainless Steel Welded Tubes include 304, 304L, 316, and 316L. These grades offer excellent corrosion resistance and mechanical properties suitable for various environments.

What sizes and dimensions can Stainless Steel Welded Tubes be supplied in?

Stainless Steel Welded Tubes are available in a wide range of outer diameters, wall thicknesses, and lengths to meet specific project requirements. Custom sizes can also be manufactured upon request.

How is the surface finish of Stainless Steel Welded Tubes?

The tubes typically come with a smooth, polished surface finish which can be further customized, such as pickling, passivation, or grinding, to enhance corrosion resistance and aesthetic appeal.

Are Stainless Steel Welded Tubes suitable for high-pressure applications?

Yes, Stainless Steel Welded Tubes are designed to withstand high pressures and temperatures, making them suitable for use in high-pressure piping systems and industrial equipment.
