## Threaded Stainless Steel Welded Tube Featuring Diameter Range 6mm to 200mm and Round Square Welding Line Type Suitable for Heavy Industrial

Our Product Introduction

for more products please visit us on [stainless-steelseamlesspipe.com](http://stainless-steelseamlesspipe.com)

### Basic Information

- Place of Origin: CHINA
- Brand Name: zheheng
- Certification: ISO9001 PED
- Minimum Order Quantity: 500
- Price: \$1000-3500/Ton
- Packaging Details: wooden
- Delivery Time: 5-45days
- Payment Terms: L/C, T/T
- Supply Ability: 10000+

### Product Specification

- Packing: Ply Wooden Case
- Mechanical properties: High Tensile Strength, Good Ductility
- Steel Grade: 300 Series, 304L, 316L, 310S Etc
- End Treatment: Threaded, Beveled, Plain, Screwed, Etc.
- Condenser Tubes Standard: ASTM A249
- Diameter range: 6mm - 200mm
- Payment Term: 30% T/T Advance + 70% Balance
- Surface finish: Polished / Matte / Brushed

## Product Description

### Threaded Stainless Steel Welded Tube

#### Product Overview

Our Stainless Steel Welded Tube is a versatile, high-quality product designed for demanding industrial and structural applications. Manufactured with precision, these tubes offer exceptional durability, strength, and aesthetic appeal, making them ideal for projects requiring reliable, long-lasting materials.

Available in various surface finishes including polished, matte, and brushed options, our tubes cater to both functional and decorative requirements. Multiple end treatments such as threaded, beveled, plain, and screwed ensure seamless integration into your projects.

#### Key Features

Product Name: Stainless Steel Welded Tube

Slot Size: 14-57mm

Welding Type: TIG, MIG, Laser

Payment Term: 30% T/T Advance + 70% Balance

Finish Options: Brush Polish, 240#, 2B BA Matte Mirror

Surface Finish: Polished, Matte, Brushed

Available as Stainless Steel Circular Tube, Stainless Steel Hollow Tube, and Stainless Steel Welded Pipe

#### Technical Specifications

Parameter	Specification
Finish	Brush Polish, 240#, 2B BA Matte Mirror
Technology	Welded
Welding Line Type	Round, Square
Origin	China
Steel Grade	300 Series, 304L, 316L, 310S Etc.
Payment Term	30% T/T Advance + 70% Balance
Condenser Tubes Standard	ASTM A249
End Treatment	Threaded, Beveled, Plain, Screwed, Etc.
Mechanical Properties	High Tensile Strength, Good Ductility
Surface Finish	Polished / Matte / Brushed

#### Applications

Our Stainless Steel Welded Tubes are widely used across multiple industries including construction, industrial machinery, automotive, aerospace, and decorative applications. Their excellent mechanical properties, corrosion resistance, and customizable features make them suitable for:

- Structural frameworks and supports
- Architectural elements and façades
- Industrial machinery and conveyor systems
- Automotive and aerospace components
- Furniture and decorative fixtures
- Fluid transport systems

#### Customization Services

We offer extensive customization options including various steel grades (300 Series, 304L, 316L, 310S), welding processes (TIG, MIG, Laser), end treatments (threaded, beveled, plain, screwed), and surface finishes (polished, matte, brushed). Custom dimensions and specific welding techniques are available to meet your project requirements.

#### Support & Services

Our comprehensive support includes detailed product information, technical guidance on installation and maintenance, custom fabrication services, rigorous quality assurance testing, and after-sales support including inventory management and training sessions.

## Frequently Asked Questions

**Q: What are the typical dimensions available for the Stainless Steel Welded Tube?**

A: Stainless Steel Welded Tubes are available in diameters from 6mm to 219mm with wall thicknesses from 0.5mm to 5mm. Custom sizes can be produced based on requirements.

**Q: What grades of stainless steel are used in these welded tubes?**

A: Common grades include 304, 304L, 316, and 316L, offering excellent corrosion resistance and durability for various industrial applications.

**Q: What manufacturing process is used for the Stainless Steel Welded Tube?**

A: The tubes are produced using high-frequency welding processes, ensuring precise dimensions and strong seams for reliable performance.

**Q: Are the Stainless Steel Welded Tubes suitable for both structural and decorative purposes?**

A: Yes, these tubes are versatile and can be used in structural applications like scaffolding and mechanical parts, as well as decorative purposes such as furniture and architectural elements.

**Q: Can the Stainless Steel Welded Tubes be customized in terms of surface finish?**

A: Absolutely. Surface finishes such as polished, brushed, or mirror finish are available upon request to meet specific aesthetic or functional requirements.
